Code Review

Kevin, Braunson

November 18, 2019

1 roles

Moderator: Kevin
Reviewers: Kevin, Braunson
Reviewee: Elieen

2 objectives

A Review of the code written by Elieen for the functionality of TimelineComponent Snapshot Test.

3 scoring

Provide a rating from 1 - 5.
1 - Work has room for improvement
3 - Work was done to an acceptable standard
5 - The work went above and beyond expectations

Criteria	Score
Completeness: (completed to the full scope of the requirements)	5
Concise: (the purpose is achieved without undue complication)	5
Documentation (Including author):	5
Structure/organization: (does the work flow well, are components grouped logically?)	4
Modularity:	5
Follows code style:	5

4 Notes

Documentation was well done, included inline comments for lines of code that were not clear.
Splitting the HTML with new lines made the snapshots easier to read
Sample data is realistic and extensive, covering all the columns we have in some

of our sample datasets

5 List of Defects

@ts-ignore should be removed and instead a null check done to prevent the compiler warning
