2 objectives

Formal review of bootstrap alerts and console-logging created by Kevin.

3 scoring

Provide a rating from 1 - 5.
1 - Work has room for improvement
3 - Work was done to an acceptable standard
5 - The work went above and beyond expectations

Criteria	Score
Completeness: (completed to the full scope of the requirements)	3
Concise: (the purpose is achieved without undue complication)	4
Structure/organization: (does the work flow, are components grouped logically?)	5
Grammar:	5

4 Notes

What was done well?
Most of the console logging was done well.
It was well organized.
Parts in console-logging file are commented well.

Other notes:

5   List of Defects

In the console-logging, some methods were missing console.logs.
In Alertcomponent.tsx, comments were missing and ts-ignore was used at some points.
AlertComponent.tsx is not working currently.
